

Azure Solution Architect Expert (AZ-305)

Temario

1. Module 1: Design governance and compute solutions
 - 1.1 Design a governance solution
 - 1.2 Design a compute solution
2. Module 2: Design storage and data integration solutions
 - 2.1 Design a non-relational storage solution
 - 2.2 Design a relational storage solution
 - 2.3 Design a data integration solution
3. Module 3: Design app architecture, access, and monitoring solutions
 - 3.1 Design an app architecture solution
 - 3.2 Design authentication and authorization solutions
 - 3.3 Design a logging and monitoring solution
4. Module 4: Design network, continuity, and migration solutions
 - 4.1 Design a network infrastructure solution
 - 4.2 Design a business continuity solution
 - 4.3 Design a migration solution
