

AWS Partner: Machine Learning on AWS for ML Practitioners- Technical

Temario

This course covers the following concepts:

1. Introduction to machine learning
2. The machine learning process
3. AWS Deep Learning Amazon Machine Images (DLAMIs)
4. Data collection, integration, preparation, visualization, and analysis
5. Amazon SageMaker concepts
6. Amazon SageMaker notebooks
7. Amazon SageMaker built-in algorithms
8. Amazon SageMaker inference, including debugging and monitoring
9. Amazon SageMaker at the edge
10. Machine learning AI services on AWS
11. Next steps and additional learning
